

PROJECT REPORT

Lyriqz
A Music App

Author:	Arun Krishna
Creation Date:	15/11/23
Last Revised:	1/12/23
Version:	1.0

INTRODUCTION

Purpose of plan

The purpose of a music app is to offer users a seamless and personalized music experience by providing access to a vast and diverse library of songs. These apps leverage algorithms to understand user preferences, delivering personalized recommendations and curated playlists. Social features enable users to share their musical preferences with friends, contributing to a community-driven environment. Offline listening capabilities address connectivity concerns, while integration with other platforms ensures a cohesive experience.

The Project Report defines the following:

1

Project purpose

Features & scope

2

Project goals
& objectives

4

Summary

Purpose of project

The purpose is to provide users with a convenient and personalized platform for accessing, discovering, and enjoying a wide variety of musical content. These apps aim to enhance the overall music listening experience by offering features such as curated playlists, personalized recommendations, and social interaction.

Phase I:

Conceptualization and Planning

Phase II:

Design and Prototyping

Phase III

Development

Phase IV:

Testing and Quality Assurance

Phase V:

Deployment and Maintenance

Project Goals and Objectives

Create an intuitive and visually appealing interface to ensure a seamless and enjoyable experience for users as they navigate the app.

Implement algorithms to analyze user preferences and behaviors, delivering personalized content and recommendations tailored to individual tastes.

Allow users to download and store music for offline listening, addressing connectivity issues and providing flexibility.

Regularly update the music library with new releases, trending tracks, and relevant content to keep the app's content fresh and engaging.

ensuring a seamless transition between platforms and enabling music enjoyment on the go.

FEATURES & SCOPE

Current Features

- High quality audio streaming.
- Offline mode.
- social integration
- Shazam integration

Upcoming Features

- Cross-Platform Compatibility
- Smart Recommendations
- Concert and Event Integration
- Integration with Fitness Apps

Scope

The Music App will be available on iOS and Android platforms. The app will integrate with popular streaming services, ensuring an extensive music library. Additionally, social features such as user profiles, and collaborative playlists will be key components to enhance the community aspect of the app.

SUMMARY

This app combines a user-friendly interface with a diverse and extensive music library, allowing users to discover, stream, and personalize their music experience. With a lot of cool features which will help the users to enjoy the music. Continuous updates and integration with other platforms contribute to keeping the app dynamic and engaging for users.
